COMPLEMENTARY LIST OF

SETTINGS FOR LESS POPULAR AND OBSOLETE TYPES

NOT LISTED ON SUPREME ROLL CHART NO. 4965-().

Due to the rapid increase in the number of receiving tube types since 1945, it has become impractical to list them all on a single chart. There are now over 750 receiving types and Television is adding new tubes at a rapid rate. This complement is published to prevent the chart from becoming overcrowded, making it difficult to locate commonly encountered types.

We rely, largely, on suggestions from users in deciding which types should be removed from the chart and placed on this complement. If there are any types listed on the chart which you rarely, or never, encounter, please let us know.
